

Technical Data Sheet

M3SCPM2S42S, M3SCPM2L42S

Product	Mobile Magnetic Custom Printed Whiteboard Meeting Station Midi
----------------	--

Components and Material	
Core panel substrate	Lightweight Honeycomb
Panel Gauge	11mm
Surface	Coated steel 0.4mm and galvanized steel backboard 0.4mm. Steel surface accepts magnets.
Aluminium Frame	Anodised aluminium 30 x 30mm. Powder coated on request.
Wheel Plates	Steel - 300mm Diameter Ø 3 x Heavy duty wheels. 1 x Wheel is lockable.
Packaging	Bulk packing on pallets includes minimum of outer card layer pad sheet pallet wrap and secured with polyester strapping and a metal buckle. Document wallet with delivery note enclosed (1 per consignment). Fixings are typically sent in an individual jiffy bag or cardboard box (1 per consignment).

...write across the board.

Technical Data Sheet

Product	Mobile Magnetic Custom Printed Whiteboard Meeting Station Midi
Board Dimensions	The board dimensions in the product descriptions are approximate. The exterior dimensions of this product is +10mm on the width and +10mm on the height. All tolerances are +5mm/-5mm. Any precise overall measurements can be requested through customer services at time of ordering.
Certificates and Standards	<p>EN ISO14001: 2004</p> <p>BS6250 – Part 3 Resistance to Heat / Blistering</p> <p>BS3900 – Part D5 Surface Gloss Levels (Erasability)</p> <p>BS5669 – Part 2 Boards Construction / Composition</p> <p>BS3962 – Part 6 Resistance to Wear and Scratching</p>
Dye Sublimation Printing Process	<p>The design is printed onto heat transfer paper, which is then placed on top of the whiteboard surface sheet in a heat press and pressed for a couple of minutes at a temperature of approx. 200 degrees Celsius.</p> <p>In this process the pores of the whiteboard sheet open, the ink is absorbed into the surface and when the sheet cools down after it is taken out of the press the pores close again to restore the integrity of the whiteboard surface.</p>
Care and Maintenance	<p>1. To prevent spreading the written ink, only wipe when it's completely dry. This is crucial with lacquered and printed boards because the solvents in the ink will cause damage to the board surface.</p> <p>2. Only wipe dry ink with a clean (!) felt or paper wiper suitable for whiteboards.</p> <p>3. Daily clean the board with cleaning spray to maintain a good erasability.</p> <p>4. NEVER use other cleaning agents than real whiteboard cleaners. Aggressive cleaners like Windolene will cause permanent damage to the board surface.</p> <p>5. When a wrong marker (flipchart marker, permanent marker) is used by accident: immediately clean the board with cleaning spray and a microfiber cloth. If that doesn't help, write over the written text with a whiteboard marker until it desolves. Clean the board with cleaning spray afterwards.</p> <p>Note! Some markers - even those of renowned brands- are poorly erasable.</p>
Guarantee	Subject to proper use in accordance with the care and maintenance instructions: 10 years surface guarantee
